

I am in opposition to both SB184, an HB5262. Secure and fair elections are not rocket science. Our mail-in ballot, absentee ballot system before 2019 was working well. Our same day registration is bad law. It increases the possibility of fraud. If someone takes the right to vote seriously, then they will register in time, if not, too bad. There is always next year. The hysteria over covid is not an excuse for bad election practices or law. We have to have voter, and voter registration systems that can be verified. No early voting. No redefinition of illness to get an absentee ballot. Mike Santangelo, Prospect.
